EDUCATION

University of California, Los Angeles

Los Angeles, CA

Master of Quantitative Economics

Expected December 2027

- **Relevant Coursework:** Machine Learning | Applied Statistics & Econometrics (R & Python) | SQL & Data Management | Principles of Big Data Management Systems
- Extracurriculars: AI Committee Appointee — UCLA Graduate Students Association

University of California, Santa Barbara

Santa Barbara, CA

Bachelor in Economics

June 2026

- Teaching Assistant for Undergraduate Economics Game Theory Course | Quantitative Modeling & Research in AI/Energy Infrastructure | UCSB 2026 Data Hack Winner | Mentors in Economics Club Mentor

PROFESSIONAL EXPERIENCE

Kelvolta Inc. — Energy Technology & Data Center Infrastructure

Redwood City, CA

Technical Intern - AI & Data Science

07/2026 - Present

- Contributing to data analytics at Kelvolta, an energy technology company.
- Work includes exploratory analysis, prospect research, and performing analyses that explore the company's future analytical capabilities.

RMR Wealth Builders

Montclair, NJ

Trading Team Intern

06/2025 - 07/2026

- Supported portfolio management and trading across \$3B in firm AUM, executing rebalancing, cash raises, and model implementation while developing allocation recommendations for advisors based on client holdings and investment objectives.
- Analyzed and reconciled portfolio data across 1,000+ accounts using Excel, Schwab, YCharts, Salesforce, and Fidelity Wealthescape, resolving discrepancies and improving the accuracy of client reporting.
- Supported revenue and operational workflows across hundreds of managed accounts, validating fee structures, account classifications, and financial data to ensure accurate quarterly processing.

Malibu Delivery

Los Angeles, CA

Owner / Operator

05/2022 - Current

- Founded and scaled a last-mile delivery business from \$0 to \$100K+ in annual revenue, serving hundreds of customers, completing thousands of deliveries, and employing a 5-person team.
- Built Excel-based demand forecasting models to optimize driver scheduling and geographic allocation, reducing labor spending by 25% through improved staffing across peak and off-peak hours.
- Analyzed order volume, delivery distance, labor costs, and customer demand to refine pricing and resource-allocation decisions across daily operations.

RESEARCH & PROJECTS

UCSB

Santa Barbara, CA

AI Infrastructure Competitiveness Research | UCSB — Prof. Ted Bergstrom | 04/2026 – Present

- Developed a quantitative framework comparing AI infrastructure investment competitiveness across 15 U.S. states using electricity prices, grid capacity, renewable penetration, data-center ecosystems, and interconnection constraints.
- Built normalized scoring models and ran 10,000-scenario Monte Carlo simulations to test investment rankings under uncertainty; modeled grid, natural gas, solar, and hybrid power strategies to evaluate regional deployment tradeoffs.
- Deployed findings through an interactive decision-support dashboard.

Util | AI Compute & Energy Optimization Platform | 01/2026 – 06/2026

- Led a 4-person team developing a UCSB-funded platform that optimized compute workloads across electricity price and carbon intensity; engineered the analytical framework, data pipelines, API integrations, and platform using Python
- Trained ML models on historical electricity-market data to forecast energy prices and emissions 8% more accurately than the public API benchmark, enabling workload shifting that reduced modeled emissions by up to 100% during periods with otherwise-unused electricity.

ADDITIONAL

Programming & Data: Python, SQL, R, Stata

Cloud & Analytics: AWS, Machine Learning, Power BI, Excel, Monte Carlo Simulation

Leadership & Service: Economic Strategy Lead for Kaiizen Foundation, SBCC ScaleMicroGrids Data Analytics Volunteer

Certifications: AWS Certified Solutions Architect | FinOps Certified Practitioner | Claude Code in Action | Series 65

Interests: Strength Training, Track & Distance Running, Surfing, Cars & Motorcycles
